

WHY WE CHOSE OPTICOMM FOR OUR COMMUNITY

OptiComm guaranteed a Fibre-to-the-Premises connection into every residence and with over 30 Retail Service Providers nationally for residents to choose from, they were the logical choice.

- ✓ Residents in our community expect the ultimate in luxury, liveability and lifestyle. From the outset our designers recognised that reliable, superfast broadband internet connectivity is fundamental to how we live, work and play in our vibrant, social, safe and connected community.
- ✓ Our concept was to ensure that all residents have access to a network that delivers high quality video streaming with more than enough capacity to support services such as **Netflix®**, **Stan®**, **Foxtel Now®**, **Apple TV 4K®**, **Kayo Sports®** and **YouTube®** at their highest definitions at peak times for a seamless viewing experience.
- ✓ Our planning also embraced the needs of larger families with many devices as well as video gamers and those operating a business from home. Our research revealed that we needed to provide a Fibre-to-the-Premises network connection to every residence so that we could guarantee the level of service that residents need now and into the future.
- ✓ Fibre-to-the-Premises has the fastest speed, largest capacity and is ready for innovation in applications that will soon require speeds of up to 1Gb/s. We realised that the Government network rollout in surrounding areas is often using old copper wires, so we could see that our neighbours may not be able to enjoy the same reliable superfast speeds available in our community.
- ✓ Retail Service Providers on the OptiComm fibre network offer a wide range of internet plans from entry level up to 1Gb/s for those looking for higher performance. Commercial grade services up to 1Gb/s are also available for business class users.
- ✓ OptiComm is an ASX-listed public company with a national fibre network and for over a decade has been connecting large communities delivered by major urban developers Australia-wide.

That's why we chose OptiComm.
